Resin Finishes

vero[®]

The Romans have used Venetian plaster for centuries to create architectural masterpieces, elegant foyers and bedrooms, and lavish bathrooms. The Rialto product line is made in Italy and carries on the long tradition of fine Italian plaster finishes. In fact, Rialto was recently selected by the Roman Antiquities Department to preserve a portion of the ancient Colosseum in Rome. Now these remarkable Italian plaster products are available in the American market.

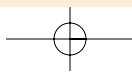

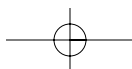

Vero, the national distributor of Rialto's Italian plaster finishes, was founded six years ago, and has since established itself all over the United States for its exceptional seasoned slaked lime products, including Antiqua and Epoca Spatolato. In addition, Vero also offers a wide range of captivating resin plasters suitable for interior use in the finest residences and places of business. These finishes are made up of quartz, granite, and resin binders that achieve authentic Venetian plaster effects using European resins and pigments. These resin plasters can create polished, glossy, sophisticated interiors, including matte and cloudy appearances. Our metallic products can be used to create striking contemporary looks in a range of colors, from gold and silver, to bronze and copper. All of these products allow for depth of color and movement that cannot be attained using conventional materials. Vero stocks, tints, and mixes the full Rialto product line in its Orange, California facility. Customers may choose from over 400 standard colors, or we can match any custom color specified. We pride ourselves on giving each sample board, production order, color match, and applicator class personal attention for complete customer satisfaction.

S o l u t i o n

A refined water repellent resin finish suitable for interiors and exteriors

- Apply to both interior and exterior walls
- Ideal for glossy finishes, but also can achieve a matte appearance
- Very easy to use and won't tear or roll under a trowel
- Water repellent and allows surfaces to breathe
- Not prone to shrinkage

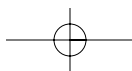

Solution is the latest generation of Venetian plaster with a traditional look and the most advanced technology in the paint and plaster world. This versatile decorative plaster incorporates siloxane resins and repels water, making it ideal for exteriors and interiors subject to moisture. Solution makes glossy finishes easy—simply burnish with a dry trowel to achieve a high-gloss look. We have a variety of standard colors to choose from, or we will gladly customize any color of your choice. This resin based plaster product can be applied on interior and exterior surfaces primed with Rialto Finish (brown coat, drywall, old paint, etc.) or over Rialto Antiqua.

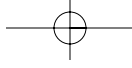

Due to variations of base coats, surface texture, weather and method of application, colors may vary.

Evolution

An interior matte or glossy finish that creates a cloudy effect using a chrome spatula or trowel. This finish can also be used as a base coat for the Metallic finishes.

- Allows wall surfaces to breathe
- Good adhesion properties
- Not prone to shrinkage
- Ready-to-use
- Can be washed
- Non-flammable
- Not harmful and is solvent-free
- Does not crack or peel
- Non-toxic

Evolution is an interior polished plaster designed to transform ordinary walls into extraordinary works of art. The concept originated near Venice, Italy and has inspired artists for centuries. Evolution can be shiny or matte, translucent or opaque, depending on the spatula technique and the final smoothing process. This finish creates an elegant look. Evolution comes in 24 standard colors, or we can match any custom color. Evolution can be applied on finished plaster, prefabricated board, plasterboard and old mineral or water based paint.

Due to variations of base coats, surface texture, weather and method of application, colors may vary.

V e n e z i a n o

A true interior Venetian plaster creating a heavy gloss finish with a chrome trowel or spatula.

- Does not crack or peel
- Good adhesion properties
- Non-flammable
- Non-toxic
- Allows wall surfaces to breathe
- Can be washed
- Ready-to-use
- Not prone to shrinkage
- Not harmful and is solvent-free

This particular technique was first introduced in Venice in the Eighteenth century. Veneziano is an interior stucco finish that gives the walls an ancient, refined and elegant charm. Different decorative effects can be achieved, such as annuolato (cloudy), where the spatula strokes fade into one another, or encausto (burnishing), where the product is applied on fine plaster and strongly polished with a trowel. There are 20 standard colors to choose from, or we can match any custom color. Veneziano can be applied to drywall and existing painted surfaces.

Due to variations of base coats, surface texture, weather and method of application, colors may vary.

Metallic Finishes for interior walls surfaces

- Very good adhesion
- Not prone to shrinkage
- Ready-to-use
- Resistant to washing

Rialto Stucco Oro (gold), Argento (silver), Bronzo (bronze), and Ottone (copper) are beautiful stucco finishes which exhibit a metallic spatula effect for interior walls. The products are based on resins and special pigments which are water resistant, ready-to-use, and which provide quality adhesion.

These four metallic finishes are generally applied over Evolution, but can also be applied over Veneziano as well as to fine plaster, drywall, and old mineral or resin based paint to achieve the unique spatula effect. Below is a chart of the suggested Evolution undercoat colors to give the metallic finishes the full effect:

Stucco Oro _____ Evolution 321

Stucco Argento ____ Evolution 204

Stucco Bronzo _____ Evolution 241

Stucco Ottone _____ Evolution 448

Due to variations of base coats, surface texture, weather and method of application, colors may vary.

Finish (Primer)

Application by SFW Plasters by Georgia
Dana Point, CA
V-899

A quartz base coat or primer

- High degree of permanent elasticity
- Water repellent
- Allows surfaces to breathe
- Does not peel or crack
- Durability
- Prevents the formation of organic growth
- Ready-to-use
- Easily applied using either a paintbrush or roller, or conventional spray
- Non-flammable
- Abrasion resistant

Finish is a resin based protective coating for interiors and exteriors, formulated with hard aggregates such as granite. It is a vapor permeable product that fills and covers the irregularities on wall surfaces. Finish is used as a crack-resistant base coat for many of the Vero plaster products, and can also be used as a finish coat. When used as a basecoat for plaster, Finish can be tinted to closely match the finish plaster coat.

Finish can be applied to plaster, architectural concrete, brick, galvanized sheets, drywall, wood and previously painted surfaces (whitewash/washable/oil,etc.) and silicate of alumina based concrete.

Cera D' Arte is a protective wax for interior wall surfaces

- Ready-to-use
- Easy-to-use
- Water repellent
- Anti-stain and wash resistant
- Perfectly transparent

Cera D' Arte is ideal for use over Evolution and Veneziano, but can also be used over our seasoned slaked lime finish Antiqua on interior wall surfaces as a water repellent. This product can be applied on other synthetic finishes with a spatula, or can be applied evenly in thin layers using a chrome trowel. Cera D' Arte may also be tinted to achieve a variety of decorative effects.
